Light snow	Light snow	Heavy snow showers	Heavy snow showers	Light snow showers (night)	Cloudy
Precipitation probability					
60%	50%	40%	30%	30%	20%

Forecast for Monday 28 Feb 2022

Weather: Cloudy start to the day with occasional, generally light, outbreaks of rain and snow. This will erratically turn to a more showery pattern from the west between mid-morning and mid-afternoon, with risk of heavier, perhaps thundery, outbreaks around western coastal ranges. Snow level 600-800m lowering 300m or less from early evening. Peaks towards the Trossachs seeing the best of the shelter.

Chance of cloud-free hill tops above 800m: Generally 10-20% at dawn becoming for the afternoon 60% in west, 75% in east, for any given time, significantly lower for prolonged clear periods due to the showery nature of the flow.

Low Cloud and visibility: Moderate or poor in rain, very poor in snow as described above. Only a few metres in cloud with bases quite extensive above 500m initially, then occasionally so in west and isolated in east in the showery flow.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Feeling bitterly cold on the tops in the strong southwest winds. Confidence medium for the detail of transition to showers during Monday.

Forecast for Tuesday 01 Mar 2022
Weather: Sunshine and showers, with outbreaks quite light and focused across western ranges, largely dying out through the evening. Snow level 300m lifting 700m by afternoon.

Maximum wind: West or southwest initially mean 25mph with gusts 35mph, easing light from the afternoon.

Chance of cloud-free hill tops above 800m: For any given time, in west 80% at first, otherwise 95% plus elsewhere, but significantly lower for prolonged clear periods due to the showery nature of the flow.

Low Cloud and visibility: Good or very good visibility lowering moderate to very poor in showers, only a few metres in cloud with bases lowering 600m as showers push through.

Temperature: **Glens:** Minus 1 Celsius increasing 9 Celsius during the afternoon
At 800m: Minus 3 Celsius increasing Zero Celsius during afternoon
Freezing level: 400m increasing 800m during afternoon
